Index

Page numbers in boldface type indicate complete chapters.

ABCs (airway, breathing, circulation), of trauma care, 49–53
Abdomen, stab wounds to, 64
Abscess
  aspiration of, 189
  “collar button,” 354
  decompression of, 189
  definition of, 339
  differentiated from cellulitis, 183, 339
  fluctuance of, 183, 185, 186, 339
  of the hand, 347–354
    acute suppurative flexor tenosynovitis, 347, 350–353
    on dorsal surface, 353–354
    felon, 347–349, 351
    paronychia, 349–350
  human bite wound-related, 340
  incision and drainage of, 188–189, 339, 353–354
Adhesives, as suturing alternative, 17–18
Adhesive tape, as suturing alternative, 18–19
Aeromonas hydrophila infections, 187, 343
Air, subcutaneous. See Crepitus
Airway management, in trauma patients, 49–51
Airway obstruction, facial fracture-related, 251
Airways, thermal injury to, 192
Albumin, serum levels of
  as nutritional status indicator, 74, 176
  in pressure sore patients, 167
Alcohol abuse, maternal, as cleft lip/palate cause, 238
Altered level of consciousness, as indication for supplemental oxygen therapy, 52
American Society of Plastic Surgery, Reconstructive Surgeons Volunteer Program of, 242
Amputated parts, care of, 305
Amputation
  necrotizing fasciitis-related, 340
  traumatic, of finger, 303–306
  of fingertip, 285
Anesthesia. See also Local anesthesia
  in facial laceration care, 146–147
  Anesthesia (cont.)
    in surgical exploration of upper-extremity injuries, 367
Animal bite wounds, 59, 185, 187, 268, 341, 343
Ankle/brachial index (ABI), 178, 179
Ankle fractures, free flap coverage of, 133–134
Anteriorsuperior iliac spine, as groin flap anatomic landmark, 130, 131
Antibacterial solutions
  as eye injury cause, 146
  for facial laceration care, 146
Antibiotic ointment
  as burn treatment, 82, 197, 198, 199, 321
  for grease removal from wounds, 284
  ophthalmic, 153
  for pressure sore treatment, 165
  for primary wound closure, 95
  as wet-to-wet dressing alternative, 83–84
Aquatic bacteria, as infection cause, 187, 341, 343
Areola, reconstruction of, 248
Arrhythmia, electrical injury-related, 193
Arterial injuries
  acute, 62
  crush injury-related, 331, 332
  hand injury-related, 268
Arterial insufficiency
  capillary refill in, 265–266
  as leg ulcer cause, 177, 178, 179, 180
Arthritis. See also Osteoarthritis; Rheumatoid arthritis
  frostbite-related, 204
Arthrodysis, 366
Arthroplasty, 366
Ascorbic acid. See Vitamin C
Aspirin
  use by traumatic amputation patients, 305
Axial groin flap, 129–133
Axial musculocutaneous flaps, 246
Axillary nerve block, 43
Bacitracin
  as burn treatment, 82, 198, 199
Bacitracin (cont.)
for grease removal from wounds, 284
as open wound treatment, 82
Backslab, 210
Bacteria, “flesh-eating.” See Fasciitis,
necrotizing
Bacterial infections
aquatic bacteria-related, 187, 341, 343
suture-related, 3
Basal cell carcinoma, 222–224
as chronic wound cause, 175
re-excision of, 231–232
treatment of, 231
Basal metabolic requirements (BMR),
74–75
Betadine
as wound cleanser, 81
Bicarbonate, as local anesthesia additive,
31, 39, 146
Bier block, 42–43
in carpal tunnel release, 363
in trigger finger release, 358
Biopsy
sentinel lymph node, 233–234
of skin lesions, 225–231
excisional, 226, 228–230
incisional, 226, 227–228
punch, 227–228
shave biopsy/excision, 226, 230–231
Bite wounds, 89
animal, 59, 185, 187, 268, 341, 343
human, 59, 187, 268, 341
Blister, 323
burn-related, 324
pus-filled, 350
Blood, dried
human immunodeficiency virus
survival time in, 47
removal from acute wounds, 62
Blood-borne pathogen exposure, safety
precautions for, 45–48
Blood flow, in foot, 178
Blood glucose. See also Diabetic patients
effect on wound healing, 58, 176
Blood pressure cuff, use as tourniquet, 64,
267, 317, 368, 369
Blood pressure measurement, without
blood pressure cuff, 52
Blood vessels
crush injuries to, 331
suturing of, 24–26
tying off of, 24–25
Blunt dissection, 26–27
Body fluids exposure, safety precautions
for, 45–48
Body surface area (BSA), of burns,
193–194, 196, 198, 202
Bone
exposure of, in fingertip injuries, 285,
287
infection of. See Osteomyelitis
Bone growth, frostbite-related impairment
of, 204
Bone rongeur, 285
Brain injury, facial fracture-associated, 251
Breast surgery, 245–250
breast mound reconstruction, 245–248
with free flaps, 133–134
with implants, 245–246
with latissimus dorsi flap, 246
nipple and areolar reconstruction in,
246, 248
with pedicle transverse rectus
abdominis muscle flap, 246–248
timing of, 248–249
breast reduction, 245, 249
in gynecomastia, 250
Bronchoscopy, for airway thermal injury
evaluation, 192
Buckshot injuries, 71
Buddy taping, of phalangeal fractures,
296, 297
Bullets
embedded in tissue, 61
radiographic evaluation of, 68
removal from wounds, 71
Bupivacaine, as local anesthetic, 30–31, 32
in digital nerve blocks, 283
in facial nerve blocks, 39, 146
in primary wound closure, 92
Burns, 59, 191–204
antibiotic ointments for, 82, 197, 198,
199, 321
body surface area (BSA) of, 194–195,
196, 198, 202
depth of, 195–196
first-degree, 196, 198, 324, 325
fluid resuscitation in, 196–197, 199
of the hand, 201, 268, 321–328
aftercare for, 327–328
care during healing, 323–324
determination of depth of, 324–325
escharotomy of, 325–326
initial treatment of, 321–324
surgical treatment of, 325–327
tangential excision of, 324, 327
initial treatment of, 193–194, 321–324
nutritional concerns associated with,
200
pain control for, 197–198
physiologic consequences of, 191
as pressure sore risk factor, 162
second-degree, 86, 196, 198–199, 201,
324, 325
Burns (cont.)
subsequent care for, 198–199
tangential excision of, 199, 200, 324, 327
third-degree, 196, 199, 202, 324, 325
Calcanceus, pressure sores of, 163
Calcium, 77
Calf
compartments of, 208, 209
compartment syndrome of, 207–211
Caloric requirements
of burn patients, 200
estimation of, 74–75
Cancer. See also specific types of cancer
as chronic wound cause, 175
as impaired wound healing cause, 58
Capillary refill
evaluation of, 62
in hand injuries, 265–266, 269
in radial artery injury, 318
in tibial and fibular fractures, 207
Carbon monoxide, blood content of, 192
Carpal tunnel
anatomy of, 360–361
definition of, 258
Carpal tunnel release, 332, 335, 362–365
Carpal tunnel syndrome, 360–365
definition of, 361
diagnosis of, 361
nonoperative treatment of, 362
operative treatment (release) of, 332, 335, 362–365
Casts
for hand injuries, 275
for metacarpal fractures, 299
tight, as compartment syndrome cause, 210
Cat-bite wounds, 59, 187, 268, 341
Catgut sutures, 4
Cat-scratch disease, 344
“Cauliflower ear,” 157
Cellulitis, 187
chronic wound-related, 80
definition of, 79, 183, 339
differentiated from abscess, 183, 339
of the finger, 351
pressure sore-related, 165
treatment of, 186
Cervical spine injury, facial fracture-associated, 251
Cheek
fractures of, 252
lacerations of
full-thickness, 152
intraoral, 151–152
Chemical burns, 193, 197
Chest, stab wounds to, 64
Chest flaps, 121, 122–124
for fingertip fracture with nail bed injury coverage, 287
Children
absorbable suture use in, 93, 147
burns in, 194
frostbite in, 204
local anesthesia injections in, 30
oral electrical burns in, 201
scarring in, 137
suture removal from, 3
Circumflex scapular artery, as axial flap blood supply source, 112
Cleansing
of acute wounds, 60–61
of burned hands, 321, 322
of facial lacerations, 146
of gunshot wounds, 70
of local flap placement sites, 114
of nerve injuries, 62
of skin flap placement sites, 100
of tendon injuries, 63, 307
Clean techniques, 81
Cleft lip/palate, 235–243
definition of, 235–237
embryologic development and etiology of, 237–238
incidence of, 237
in utero repair of, 239
initial corrective operations for, 239–241
nutritional concerns in, 238–239
Pierre Robin syndrome-associated, 242–243
presentation of, 237
visiting surgeon programs for, 241–242
Clothing
penetration of, by foreign objects, 59
removal from patients from gunshot wound patients, 67
from trauma patients, 54
Cold, anesthetic effect of, 30
Collagen
in scar healing, 137
synthesis of, nutrient requirements for, 76
Colloid resuscitation, of burn patients, 200
Compartment syndromes, 192, 207–211, 330, 331, 333–338
definition of, 207
etiology of, 333
prevention of, 210
signs and symptoms of, 209
treatment of, 210–211, 334–335
“vicious cycle” of, 333, 337–338
Computed tomography, of facial fractures, 253
Conjunctivitis, antibiotic ointment-related, 153
Copper, dietary intake of, 77
Creptitus, 185, 186, 340, 342
Cricothyroidotomy, surgical, 50–51
Cross-arm flaps, 125–126
   for fingertip injury coverage, 287
Cross-leg flaps, 126–129
   for open tibial-fibular fracture coverage, 218
Crush injury, 59, 268, 329–333
   definition of, 329
   as disability cause, 329
   effects on tissues, 330–331
Dakin’s solution, 81, 89
Debridement
   of blisters, 323
   of chronic wounds, 173, 174, 180
   definition of, 79
   of facial lacerations, 146
   of frostbitten tissue, 203–204
   of gangrene, 340
   of necrotizing fasciitis, 184, 340
   of pressure sores, 161, 165–166, 167
Decompression. See also Fasciotomy
   of abscess, 189
   of paronychia, 349
Defatting, of skin grafts, 107–108
   in fingertip injuries, 285
Degloving injury, 330, 333
Delay procedure, for local flap formation, 113–114
Dermatome, 101, 102, 200
Dermis, anatomy of, 97–98
Diabetic patients
   hand infections in, 341
   impaired wound healing in, 58, 176
   soft-tissue infections in, 185
   steroid injections in, 142
Diazepam, 42
   use in burn patients, 197
Digital arteries, injuries to, 318
Digital nerve blocks, 34–35, 41
   as contraindication to epinephrine administration, 32
   in finger fracture reduction, 294
   in fingertip injury repair, 283–284
   in joint dislocation reduction, 300
   in nail removal, 290
Digital nerves
   accidental suturing of, 318
   anatomy of, 314
   injuries to, 315
   location of, 34
   repair of, 315–317
DIP. See Distal interphalangeal joints
Direct infiltration, of local anesthetics, 33
Disinfection, of contaminated surfaces, 47
Dislocations
   acute wound-related, 63, 64
   crush injury-related, 332
   of finger joints, 271, 280
      complex, 300, 301
      interphalangeal, 300–301
      metacarpal, 300
      simple, 300–301
Dissection
   blunt, 26–27
   sharp, 27
Distal interphalangeal joints (DIP)
   definition of, 258
   osteoarthritis of, 365, 366
Distal phalanges, fractures of, 286, 289, 294–296
   intraarticular, 295–296
   mallet deformity of, 310
   open, 286
   shaft, 295
   tuft, 294–295
Dog-bite wounds, 187, 268
Donor sites
   for flaps, 111
      chest flaps, 121, 123
      distant flaps, 121, 123, 126, 127, 132
   for skin grafts
      full-thickness grafts, 107, 109
      split-thickness grafts, 100, 106
Drainage. See also Incision and drainage
   of abscess, 188–189
   of acute suppurative flexor tenosynovitis, 351–352
   of hand infections, 344, 345
   of paronychia, 349
   of pus from wounds, 89
   of subungual hematoma, 287, 289
Dressings. See also Gauze dressings
   for amputation stumps, 305
   for burns, 197
   for ear lacerations, 157
   for fasciotomy sites, 337
   for fingertip injuries, 285, 286
   for gunshot wounds, 70, 80–83
   for hand injuries, 281
   for pressure sores, 165
   for secondary wound closure sites, 89, 91
   for skin grafts, 105, 108–109
   solutions for, 81
      wet-to-dry, 82–83
         for chronic wounds, 173, 174, 180
         for delayed primary wound closure, 96
         for secondary wound closure sites, 89
         for traumatic amputations, 304
Dressings (cont.)
- wet-to-wet, 83
  - antibiotic ointment as alternative to, 83–84
  - for pressure sores, 165
- DuoDERM, as pressure sore dressing, 165

Ear, full-thickness external lacerations of, 156–157
Ear piercing, as keloid cause, 142–143
Ectropion, 158
Eikenella infections, of bite wounds, 187, 343

Electrical burns, 192–193
  - oral, in children, 201
Electric stimulation, as nerve injury repair technique, 315
Electrocautery devices, 23, 24
  - use in skin lesion biopsy, 230, 231–232
Electrodiagnostic studies, of carpal tunnel syndrome, 361
Elevation
  - of burned hand, 322, 326
  - of forearm, in compartment syndrome, 337
  - of hand, in compartment syndrome, 337
  - of infected hand, 344, 345
  - of injured hand, 281
Endotracheal intubation
  - for airway patency, 50
  - in inhalation injury patients, 192
Epidermis, anatomy of, 97
Epinephrine, as local anesthesia additive, 31–32
Epineurium, 313–314
  - suture placement in, 315, 316–317
Escharotomy, of burns to the hand, 325–326
Esmarch, 368, 369, 370
Ethyl chloride, anesthetic action of, 30

Exposure, of trauma patients, 54

Extensor pollicis longus tendon, motor examination of, 262
Extensor tendons, of the hand
  - motor examination of, 262
  - splinting of, 278, 279
Extraarticular fractures, of middle or proximal phalanges, 296–297
Extrinsic muscles, of hand, evaluation of, 261–262, 263
Exudate
  - definition of, 79
Eyebrows, lacerations of, 154–155
Eyelids
  - lacerations of, 153–154
  - lower, involvement in facial wound closure, 88

Facial injuries
- fractures, 251–256
  - basic initial treatment of, 253
  - diagnosis of, 252–253
  - initial evaluation of, 251
  - mandibular fractures, 253–256
  - gunshot wounds, 70–71
- lacerations, 145–159
  - anesthesia for, 146–147
  - initial care for, 146
  - jaw fracture-related, 253
  - soft-tissue loss associated with, 158–159
  - specific types of, 149–159
  - suturing of, 147–149
  - unique properties of, 145
  - near lower eyelid, 88
  - nerve blocks for, 38–41, 147
  - suture removal from, 95
  - wound closure of, 58
  - local anesthesia for, 92
  - suture sizes for, 2
  - suturing techniques for, 93
Fasciitis, necrotizing, 184, 186, 340, 342, 344
Fasciotomy
  - of calf, 210–211
  - of fingers, 336
  - of forearm, 334–335
  - of hand, 335–336
Felon, 347–349, 351
Femur, closed fractures of, as blood loss cause, 52

Fingers. See also Distal phalanges; Middle phalanges; Proximal phalanges
- amputated, replantation of, 304–305
- digital nerves of, 34
- digital tourniquet use in, 368
- escharotomy of, 325
- exploratory incisions in, 371–372
- fasciectomy of, 336
- fractures of, 63, 271, 293–299
  - anesthesia for, 294
  - definitions related to, 293–294
  - distal phalangeal, 294–296
  - metacarpal, 298–299
  - middle and proximal phalangeal, 296–298
  - shaft, 295
- joint dislocations of, 300–301
- lacerations of, mallet deformity associated with, 312
- little, splinting of, 279–280
- nerve blocks of, 34–35, 41
  - as contraindication to epinephrine administration, 32
- rotational deformities of, 266, 268, 271, 296, 297
Fingers (cont.)
  splinting of, 268, 279–280
  trigger, 355–360

Fingertips
  felon of, 347–349, 351
  injuries to, 283–289
    aftercare for, 285–286
    complicated injuries, 286–289
    digital tourniquet for, 284
    initial care for, 283–284
    treatment of, 285
  traumatic amputation of, 285

Flaps
  classification of, 111
  definition of, 111
  distant, 121–135
    for acute wound coverage, 65
    attached, 121–133
    axial, 129–133
    chest flap, 122–124
    cross-arm, 121, 125–126, 287
    cross-leg, 126–129, 218
    for fingertip injury coverage, 287
    free, 121, 122, 133–134
    groin, 129–133
    random, 121–129
    for tibia and fibula fracture coverage, 218
  local, 27, 111–120
    for acute wound coverage, 65
    axial, 112–113, 120
    classification of, 112–113
    delay procedure for, 113–114
    for melanoma excision site coverage, 232
    muscle flaps, 111, 120, 212–218
    for pressure sore coverage, 166–172
    random, 113, 114–119
    rhomboid, 115–116
    rotation, 117–118
    V-Y advancement, 114, 118–119,
      170–171
    rotation buttock, for pressure sore
      coverage, 168–169
    3:1 rule for, 114, 122
    tensor fascia lata, for pressure sore
      coverage, 169–170

Flexor carpi radialis tendon, anatomic
  relationship with median nerve, 36

Flexor carpi ulnaris tendon, anatomic
  relationship with ulnar nerve, 37

Flexor digitorum profundus tendon,
  motor examination of, 262

Flexor digitorum superficialis tendon,
  motor examination of, 261

Flexor pollicis longus tendon, motor
  examination of, 262

Flexor sheath, acute suppurative
tenosynovitis of, 350–352

Flexor tendons
  anatomic relationship with carpal
    tunnel, 360
  course of, 355
  injuries to, 270, 271–273
  splinting of, 277–278
  motor examination of, 262

Fluctuance, of abscess, 183, 185, 186, 339

Fluid resuscitation, of burn patients,
  195–196

Foot
  burns of, 201–202
  pseudomonal infections of, 59

Forceps, use in suturing, 5, 6–7

Forearm
  crush injury to, 331–333
  escharotomy of, 325
  fasciotomy of, 334–335
  infections of, 342
  lacerations of, 374
  surgical exploration of, 367–374
    anesthesia in, 367
    incisions in, 367, 370–374
    tourniquet use in, 367–370

Forehead, lacerations of, 155

Foreign material
  as chronic wound cause, 174, 180
  embedded in acute wounds, 59, 60,
    61–62, 64
  embedded in crush injury wounds,
    330
  embedded in gunshot wounds, 70, 71
  embedded in hand wounds, 268, 271
  as hand infection cause, 341, 342, 343
  as infection cause, 61
  as primary wound closure
    contraindication, 91
  removal from traumatically-amputated
    parts, 305
  as soft-tissue infection cause, 185, 186

Fractures
  closed
    definition of, 293–294
    of tibia and fibula, 206
  comminuted
    crush injury-related, 331
    of tibia and fibula, 207
  compartment syndrome-associated,
    337
  crush injury-related, 331, 332
  facial, 251–256
    basic initial treatment of, 253
    diagnosis of, 252–253
    initial evaluation of, 251
    mandibular fractures, 254–255
Fractures (cont.)
of fingers, 63, 266, 280, 271, 293–299
anesthesia for, 294
definitions related to, 293–294
distal phalangeal, 286, 289, 294–296
mallet deformity-associated, 310, 312
metacarpal, 266, 298–299
middle and proximal phalangeal fractures, 296–298
shaft fractures, 295
frontal sinus, 155
gunshot wound-related, 68
hand infection-related, 342
open (compound), 63, 64
definition of, 293
of distal phalanx, 286
of the fingertips, 287, 289
hand injury-associated, 271
muscle flap coverage for, 120
of tibia and fibula, 206, 210, 211–218
with overlying wounds, 88
of tibia and fibula, 205–219
case example of, 205–206
closed fractures, 206
comminuted, 207
compartment syndrome associated with, 207–211
distant flap coverage for, 218
free flap coverage for, 218
local muscle flap coverage for, 212–218
open (compound) fractures, 206, 210, 211–218
Free flaps, 133–134
for tibia and fibula fracture coverage, 218
Freshwater-associated bacterial infections, 187, 341
Frostbite, 202–204
Gangrene
dry, 183–184, 340
wet, 184, 186, 340
Gastrocnemius flaps, 213–216
Gastrocnemius muscle, anatomy of, 213–214
Gauze dressings, 80, 81
saline-moistened, for burns, 197
for skin grafts, 105
as wet-to-dry dressings, 82–83
as wet-to-wet dressings, 83
Glasgow Coma Scale, 53–54
Gloves
nonsterile, 81
protective, 46
sterile, 80–81
Goggles, protective, 47
Granulation tissue, definition of, 79
Grease
removal from burned tissues, 197, 321
removal from fingertip wounds, 284
Groat flap, 129–133
Gunshot wounds, 59, 67–71
bullet removal from, 71
entrance and exit sites of, 69, 70
external wound care for, 69–70
initial treatment of, in stable patients, 67–69
Gynecomastia, 250
Hand. See also Fingers
abscesses of, 347–354
acute suppurative flexor tenosynovitis, 347, 350–353
on dorsal surface, 353–354
 felon, 347–349, 351
paronychia, 349–350
amputated, replantation of, 304–305
anatomic positions of, 257–258
blood supply to, 264–265, 318
chronic conditions of, 355–366
carpal tunnel syndrome, 360–365
osteoarthritis, 365–366
trigger finger, 355–360
finger alignment of, 266
infections of, 339–345
bite wound-related, 59
evaluation of, 341–342
general initial treatment of, 344–345
normal, examination of, 257–266
extrinsic muscle/intrinsic muscle nerve supply evaluation in, 263–264
motor examination, 261–262
sensory examination, 259–260
vascular evaluation in, 264–266
Hand injuries
bite wounds, 59, 187, 268, 341, 343
burns, 201, 268, 321–328
aftercare for, 327–328
care during healing, 323–324
determination of depth of, 324–325
escharotomy of, 325–326
initial treatment of, 321–324
surgical treatment of, 325–327
tangential excision of, 324, 327
 crush injuries, 59, 268, 331–333
dressings for, 281
evaluation of, 267–273
motor examination in, 270
patient history in, 267–269
physical examination in, 269–271
sensory examination in, 270
Hand injuries (cont.)
evaluation of (cont.)
  tendon examination in, 270
  in unconscious patient, 271–273
  vascular examination in, 269–270
  general aftercare for, 281–282
  nerve blocks for, 34–38
digital blocks, 34–35, 41
  wrist blocks, 35–38, 41
  splinting of, 275–280
  versus casting, 275
duration of, 282
  materials for, 275–276
  splint construction for, 276
  splint position and contour in,
  276–280
  surgical exploration of, 367–374
  anesthesia in, 367
  incisions in, 367, 370–374
  tourniquet use in, 367–370
  suture removal from, 95
to the tendons, 307–312
  extensor tendon injuries, 308–312
  flexor tendon injuries, 307–308
  mallet finger, 310–312
Handwashing, for infectious disease prevention, 46
Harelip. See Cleft lip/palate
Harris-Benedict equation, 74–75
Head injury
  Glasgow Coma Scale evaluation of,
  53–54
  as pressure sore risk factor, 162
  supplemental oxygen therapy in, 52
Hematoma, 87
  ear laceration-related, 157
  subungual, 287, 289
Hematoma block, in metacarpal fracture reduction, 298
Hemorrhage
  acute wound-related, 57, 58, 63–64
  exsanguinating/pulsatile, 64, 317
  hand injury-related, 267, 268, 269
  as pseudoaneurysm cause, 317–318
  gunshot wound-related, 68
  lip laceration-related, 151
  management of, 24–26
  scalp wound-related, 156
  from skin edges, 23–24
  after tourniquet release, 370
  in trauma patients, 52
Hepatitis, transmission by needlestick injury, 5
Hepatitis B virus
  contagiousness of, 45
  postexposure treatment for, 48
  prevalence of, 46
Hepatitis C virus
  contagiousness of, 45
  postexposure treatment for, 48
  prevalence of, 46
Hepatitis D (delta) virus, 46
Herpetic infections, of the fingers, 350
Human bite wounds, 59, 187, 268, 341
Human immunodeficiency virus infection (HIV)
  as impaired wound healing cause, 58
  postexposure treatment for, 48
  prevalence of, 45
  transmission by needlestick injury, 5
Humby knife, 101, 102–103
Hyperbaric oxygen therapy, for necrotizing fasciitis, 184, 340
Hypotension, trauma-related, 52–53
Hypothenar eminence, 258
Hypothenar muscles, fasciotomy of, 335
Incision and drainage, 342
  of abscess, 188–189, 339, 353–354
  contraindication in herpetic infections,
  350
  of felon, 347–348
Incisions, 21–23
  Brunner zigzag, 372, 373
  for compartment syndrome treatment.
  See Fasciotomy
  for escharotomy, 325–326
  for surgical exploration of upper-extremity injuries, 367, 370–374
  in fingers, 371–372
  in forearm, 374
  in hand, 371–372
  for trigger finger release, 358–359
Incontinence, as pressure sore cause, 163
Infants
  congenital trigger finger in, 356
  protein requirements of, 76
Infections
  as chronic wound cause, 174–175
  foreign body-related, 61, 185, 186, 341, 342, 343
  of the hand, 339–345
  evaluation of, 341–342
  general initial treatment of, 344–345
  after secondary wound closure, 89
  signs of, 89
Infectious disease exposure, safety precautions for, 45–48
Infraorbital nerve, facial fracture-associated injury to, 252
Inhalation injury, 192, 202
Injection, of local anesthetics, 30–33
Instruments
   sharp
      disposal of, 47
      safety precautions for use of, 46, 47
      sterile, 80–81
      for suturing, 5–7
   Interferon therapy, for hepatitis C patients, 48
   Intermaxillary fixation, Ivy loops procedure for, 254–256
   Intercostal muscles, fasciotomy of, 335
   Interphalangeal joints (IP)
      burn-related stiffness of, 323
      definition of, 258
      extension of, 264, 270
   Interplast, 242
   Intravenous access, in trauma patients, 52
   Intrinsic muscles
      dysfunction of, 261
      evaluation of, 263
   Intubation. See also Endotracheal intubation
      for airway patency, 50
   IP. See Interphalangeal joints
   Iron, dietary intake of, 77
   Iron supplementation, for wound healing, 176
   Irrigation
      of acute wounds, 60–61
      of chemical injuries, 193
      of flexor sheath, 352
   Ischial pressure sores, 161, 163, 170–171
   Ivy loops procedure, for intermaxillary fixation, 254–256
   Jaw
      fractures of, 253, 254–256
   Joints
      crush injuries to, 331
      dislocations of. See Dislocations
      frostbite-related stiffness of, 204
      hand infection-associated contamination of, 342
   Keloids, 138, 139, 142
      ear piercing-related, 142–143
      secondary wound closure-related, 86
   Keratoses, seborrheic, 223
   Knife, skin-graft (Humby), 101, 102–103
   Knife blades, for incisions, 21–23
   Knife wounds, 58, 64, 268
   Kwashiorkor, 73
      marasmic, 74
   Labial artery
      hemorrhage from, lip burn-related, 201
      injuries to, 151
   Lacerations
      of the cheek
         as ectropion cause, 158
         full-thickness, 152
         intraoral, 151–152
         crush injury-related, 332–333
      of the face, 145–159
         anesthesia for, 146–147
         initial care for, 146
         jaw fracture-related, 253
         soft-tissue loss associated with, 158–159
         specific types of, 149–159
         suturing of, 147–149
         unique properties of, 145
         of the forearm, 374
   Latissimus dorsi flaps, 246
   Leg, ulcers of, 177–180
   Lidocaine
      as local anesthetic, 30–31, 32
      in axillary blocks, 43
      in Bier blocks, 42–43
      in digital nerve blocks, 283
      in facial lacerations, 146
      in facial nerve blocks, 39
      in primary wound closure, 92
      in scalp lacerations, 156
      in wound cleansing, 60
   Lignocaine. See Lidocaine
   Lip
      burn injuries of, 201
      lacerations of, 149–151
   Local anesthesia, 29–44
      action mechanism of, 29
      additives to, 31–32
      direct infiltration of, 33
      dosage of, 30–31, 32, 33
      duration of action of, 32
      for facial lacerations, 146–147
      in gunshot wound treatment, 71
      injection of, 30–33
      safety precautions for, 33
      as nerve blocks, 30, 34–42
         axillary blocks, 43
         Bier blocks, 39–43
      in facial injury repair, 39–41, 147
      in hand injury repair, 34–39, 41
      with sedation, 41–42
      in wound cleansing, 60, 92
      overdose of, 33
      topical agents, 29–30
   Lymphadenectomy, in melanoma patients, 232
   Lymphangitis, 183, 339, 344
   Lymph nodes, enlarged
      hand injury-related, 342, 344
      skin cancer-related, 225
Mafenide acetate, as burn treatment, 198
Magnesium, dietary intake of, 77
Mallet finger, 310–312
   closed, 310–312
   distal phalangeal fracture-related, 295
   open, 312
Malnutrition, 73–74
   as chronic wound cause, 176
   as impaired wound healing cause, 58, 73
Mammaplasty, reduction, 245, 249
Mandible, fractures of, 253, 254–256
Marasmus, 73, 74
Maraine. See Bupivacaine
Massage, of scar tissue, 140, 142
Mastectomy
   breast reconstruction after. See Breast reconstruction
   as gynecomastia treatment, 250
MCP. See Metacarpophalangeal joints
Medial nerve
   anatomic relationship with carpal tunnel, 360, 361
   anatomy of, 36
   compression of. See Carpal tunnel syndrome
   function testing of, 263, 270
   sensory distribution of, 259, 260
Median nerve block, 35–37
Melanoma
   appearance of, 222–223
   etiology of, 222
   genetic factors in, 224
   physical examination of, 225
   re-excision of, 232–233
   sentinel lymph node biopsy of, 233–234
Mental nerve blocks, 41, 147
Mesher, 103, 104
Metacarpal fractures, 266, 298–299
Metacarpophalangeal joints (MCP)
   burn-related stiffness of, 323
   definition of, 258
   human bite wounds to, 341
   osteoarthritis of, 365
Midazolam, 42
   use in burn patients, 197
Middle phalanges, fractures of, 296–298
   extraarticular, 296–297
   intraarticular, 298
Mole, cancerous, 221–222, 223
Motion, of injured hand and fingers, 282
Motor examination
   of injured hand, 270
   of normal hand, 261–262
Motor nerves, of hand, injuries to, 317, 331
Mouth, lacerations of, 151–152
Mucosa, oral, lacerations of, 150–152
*Mycobacterium marinum* infections, of the hand, 343, 344
Myoglobinuria, 192–193, 207–208, 333
Nail bed injuries, 287, 289–291
Nails
   growth rate of, 289
   paronychia of, 349–350
   removal of, 290
Nasal airway tubes, 50
Needles
   for injections, proper use and disposal of, 47
   for suturing, 1–2, 6
   holder for, 5, 6
   proper use and disposal of, 47
Needlestick injuries, 5, 47–48
Nerve blocks, 34–41
   in attached distant flap placement, 124
   in facial injury repair, 38–41, 147
   infraorbital, 38, 40–41
   mental nerve, 41
   supraorbital, 38, 39–40, 41
   supratrochlear, 38, 40, 41
   in hand injury repair, 34–38
   digital block, 34–35, 41
   wrist block, 35–38, 41
   in primary wound closure, 92
   in surgical exploration of upper-extremity injuries, 367
   in wound cleansing, 60
Nerve grafts, 316–317
Nerve injuries, 62, 313–317
   crush injuries, 330
   repair of, 315–317
Nerves, anatomy of, 313–314
Neurovascular bundles, digital, 355
Neurovascular examination, of gunshot wound patients, 68, 69
Nipple, reconstruction of, 248
Nonsteroidal anti-inflammatory drugs (NSAIDs)
   as carpal tunnel syndrome treatment, 362
   deleterious effect on wound healing, 177
Nose, lacerations of, 153
Numbness, in the hand
   carpal tunnel syndrome-related, 361
   compartment syndrome-related, 334
Nutrition, 73–78
Nutritional status
   assessment of, 74–75, 176
   of pressure sore patients, 167
   required for wound healing, 76–78, 176, 180
Nutritional support, for burn patients, 200
Nylon sutures, 4

Occupational therapy
for carpal tunnel syndrome patients, 362, 365
for hand burn patients, 323
for osteoarthritis patients, 365
Operation Smile, 242
Oral airway tubes, 50
Orbit, fractures of, 252
Osteoarthritis, 365–366
Osteomyelitis, chronic, 174–175
felon-related, 347
open fracture-related, 206, 211–212
Overdose, of local anesthetics, 33
Pain control
in burn patients, 196–197, 321
during dressing changes, 82
in fingertip and nail bed injury patients, 291
in hand burn patients, 324
in osteoarthritis patients, 365
during rewarming of frostbitten tissue, 203
in traumatic amputation patients, 304, 305

Palate, anatomy of, 235, 236
Palmar arch, 264, 269–270
Palmaris longus tendon, anatomic relationship with median nerve, 36
Paraplegic patients, pressure sores in, 162
Parkland formula, for fluid resuscitation of burn patients, 195–196
Paronychia, 349–350
Parotid duct, in mouth laceration repair, 151
Pasteurella infections, of bite wounds, 187, 343
Pedicle
definition of, 111
of distant flaps, 121
of local flaps, 113, 114, 115, 116, 117, 118
Perineurium, 313–314
Phalanges. See also Distal phalanges;
Fingers; Middle phalanges; Proximal phalanges
definition of, 258
fractures or dislocations of, 280
Phalen’s sign, 361
Pierre Robin syndrome, 242–243
PIP. See Proximal interphalangeal joints
Pneumothorax, tension, 52–53, 54
needle thoracostomy for, 54–56
Poison control centers, 193
Polydioxanone sutures, 4
Popliteal artery pulse, in gunshot wound patients, 68
Posterior tibial artery pulse
in arterial insufficiency patients, 178
in gunshot wound patients, 68
in tibial and fibular fracture patients, 207
Povidone iodine, 146
Prealbumin, serum levels of
as nutritional status indicator, 74, 176
in pressure sore patients, 167
Pressure, as hemorrhage control technique, 24, 317
Pressure earrings, 142–143
Pressure garments, 141, 142, 327–328
Pressure sores, 161–172
causes of, 162
debridement of, 161, 165–166, 167
decubitus ulcers, 161
definition of, 161, 180
early treatment of, 164–166
ischial, 170–171
local flap coverage for, 166–172
prevention of, 163
risk factors for, 162–163
sacral, 168–169
rotation flap coverage for, 117–118
staging system for, 164, 165–168
surgical treatment of, 166–171
trochanteric, 169–170
Prolene sutures, 4
Protein
dietary requirements for, 76
dietary sources of, 75
serum content of
in malnutrition, 73
as nutritional status indicator, 74
Protein stores, inadequate, as contraindication to surgery, 176
Proximal interphalangeal joints (PIP)
definition of, 258
osteoarthritis of, 365, 366
Proximal phalanges, fractures of, 296–298
extraarticular, 296–297
intraarticular, 298
Pseudoaneurysm, 186, 317–318
Pseudomonal infections, 59, 89
Pulley system, flexor tendon
in flexor tenosynovitis, 350–351
in trigger finger, 355, 356, 357–358
Pulse. See also Popliteal artery pulse;
Posterior tibial artery pulse; Radial artery pulse; Ulnar artery pulse
in arterial injuries, 62
Pulse (cont.)
   as blood pressure measure, 52
   in gunshot wound patients, 68–69
Punch biopsy procedure, 227–228
Puncture wounds. See also Bite wounds
   cleansing of, 60
   as hand infection cause, 341, 342
   as soft-tissue infection cause, 185
Quadruple patients, pressure sores in, 162, 163
Rabies, 59–60, 268, 341
Radial artery
   as axial flap blood supply source, 112
   palpable radial pulse associated with, 270
   location of, 264, 265
Radial artery pulse, 52, 264
   in injured hand, 269–270
   location of, 38
Radial forearm flap, 134
Radial nerve
   function testing of, 270
   sensory distribution of, 259, 260
Radial nerve block, 38
Radiation therapy
   as chronic wound cause, 177
   for keloid prevention, 143
Radiography. See also X-rays
   Panorex, for mandibular fracture evaluation, 252
Random flaps
   distant, 121–129
   local, 113, 114–119
Recommended dietary allowances (RDA)
   for minerals, 77–78
   for protein, 76
   for vitamins, 77
Redness, of skin
   infection-related, 89
   scar-related, 141–142
   around suture line, 95–96
Red streaking, of skin
   hand infection-related, 342
   lymphangitis-related, 339, 344
Regional anesthesia, intravenous (Bier block), 42–43, 358, 363
Regional block, upper-extremity axillary block, 43
Rehabilitation, of traumatic amputation patients, 305
Replantation, of traumatically-amputated parts, 304–305
Respiratory depression, sedative medication-related, 42
Rewarming, of frostbitten tissue, 203
Rheumatoid arthritis, tenosynovitis associated with, 353
Rhinoplasty, in cleft lip/palate patients, 241
Ringer’s lactate solution, 196
Rings, removal from injured hands, 269
Rotational deformity, of fingers, 266, 268, 271, 296, 297
Rotation flaps, 168–169
Rule of nines, for determination of burned body surface area, 193–194
Sacrum, pressure sores of, 163, 168–169
   rotation flap coverage for, 117–118
Saline, as wound cleanser, 81
Scalp injuries
   blood loss from, 52
   full-thickness lacerations, 155–156
   local anesthesia use in, 92
SCALP mnemonic, for layers of the scalp, 155–156
Scars, 137–144
   abnormal, 138
   adhesive materials-related, 17–18
   appearance of, 137
   burn-related, 324
   clinician’s care for, 140–143
   contracture of, secondary wound closure-related, 86
   excessive redness of, 141–142
   facial wounds-related, 93, 145
   hypertrophic, 138, 139, 142
   maturation of, 137
   patient’s care for, 140
   secondary wound closure-related, 86, 88, 89
   strength of, 137
   suture-related, 2, 3
   tight, secondary wound closure-related, 86, 88, 89
   unstable, 138
   secondary wound closure-related, 86
Scissors, suture, 5, 6
Seawater-associated bacterial infections, 187
Sedation, as adjunct to local anesthesia, 42
   of burn patients, 197
Sensory examination, of injured hand, 270
Sentinel lymph node biopsy, 233–234
Sharp instruments
   disposal of, 47
   safety precautions for use of, 46, 47
Shave excision, of skin lesions, 230–231
Shellfish-related bacterial infections, 187
Shock, 53
Shotgun injuries, 71
Silicone breast implants, 245
Silicone gel sheets, application to scars, 140–141, 142
Silk sutures, 4
Silver nitrate, as burn treatment, 198
Silver sulfadiazene, as burn treatment, 82, 198, 199, 321
Sinuses, frontal, fractures of, 155
Skin
   anatomy of, 97–98
   defatting of, for skin flaps, 107–108
      in fingertip injuries, 285
   functions of, 191
   ischemia-related death of, 87
Skin cancer, 221–234
   basal cell carcinoma, 223–224
      as chronic wound cause, 175
      treatment of, 231
   biopsy of, 225–231
      excisional, 226, 228–230
      incisional, 226, 227–228
      pathology report of, 231–232
      punch procedure, 227–228
      shave biopsy/excision, 226, 230–231
   evaluation of, 224–225
   melanoma
      appearance of, 222–223
      etiology of, 222
      genetic factors in, 224
      physical examination of, 225
      re-excision of, 232–233
      sentinel lymph node biopsy of, 233–234
   postexcision care for, 234
   squamous cell carcinoma, 221, 223, 224
      as chronic wound cause, 175
      tongue reconstruction in, 134
      treatment of, 231–232
   unstable scar-associated, 86
Skin creases
   definition of, 258
   wound closure over, 88, 89
Skin edges
   excision of, in gunshot wounds, 70
   hemorrhage from, 23–24, 31
   undermining of, 27
Skin grafts, 97–109
   for acute wounds, 65
   anatomic basis for, 97–99
   contraindications to, 99–100
   for eyelid laceration coverage, 154
   for facial wound coverage, 158
   full-thickness, 106–109
   amputated skin as, 303, 304
   defatting of, 107–108
   for fingertip injury coverage, 285
Skin grafts (cont.)
   split-thickness, 100–106
      aftercare for, 106
      for burn coverage, 199, 201
      for chronic wound coverage, 181
      for compartment syndrome-related
         wound closure, 210–211
      graft harvesting technique in,
         101–103
      for hand burn coverage, 324, 326, 327
      for melanoma excision site coverage,
         232
      for open fracture coverage, 212
      placement of, 104–105
      preparation of, 103–104
      for venous ulcer coverage, 179
      wound dressing for, 105–106
   for unstable scar coverage, 143
Skin redness
   infection-related, 89
   scar-related, 141–142
   as streaking
      hand infection-related, 342
      lymphangitis-related, 339, 344
      around suture line, 95–96
Skin staples, 16–17, 18
Skull, occiput, pressure sores of, 163
Smoking
   as impaired wound healing cause, 58,
      175, 282
   in crush injury patients, 332
   in skin graft recipients, 106, 109
   in traumatic amputation patients, 304
Soft tissue, facial laceration-related loss of, 158–159
Soft-tissue coverage, of hand injuries, 271
Soft-tissue infections, 183–189
   antibiotic therapy for, 186–188
   evaluation of patients with, 184–186
   general treatment of, 186
   incision and drainage of, 188–189
Soft-tissue tumors, as chronic open
   wound cause, 175
Soleus flap, 216–218
Spinal cord injury
   examination of, 54
   as hypotension cause, 52, 53
Splinting
   of acute suppurative flexor
      tenosynovitis, 351, 352
   of burned hands, 324, 327
   as carpal tunnel syndrome treatment,
      337, 362
   of crush injuries, 333
   of distal interphalangeal joint fractures,
      286
   of distal phalangeal fractures, 295
Splinting (cont.)
- of extensor tendon injuries, 308
- of finger injuries, 268
- of flexor tendon injuries, 307–308
- of hand injuries, 275–280
- of infected hands, 344, 345
- of mallet finger, 310–311, 312
- of metacarpal fractures, 299
- of phalangeal fractures, with rotational deformity, 297
- post-fasciotomy, 337
- of tibial and fibular fractures, 210
- of tight scars, 141
- of tuft fractures, 295

Splints, Stack (volar), 310, 311

Squamous cell carcinoma, 221, 223, 224
- as chronic wound cause, 175
- re-excision of, 232
- tongue reconstruction in, 134

Stab wounds, 58, 64, 268

Staphylococcal infections, of the hand, 343, 344, 349

Staples, skin, 16–17, 18

Sterile technique, 80–81

Steristrips, 139

Steroid injections
- as carpal tunnel syndrome treatment, 362
- as keloid treatment, 142
- as trigger finger treatment, 357–358

Steroids, deleterious effect on wound healing, 177

Stick ties, 26, 318

Streptococcus viridans infections, human bite wound-related, 343

Stress, effect on dietary protein requirements, 76

Sulfamylon, as burn treatment, 198

Sun exposure, as skin cancer risk factor, 222, 223, 225, 234

Sunscreen
- application to scars, 140, 141
- use by skin cancer patients, 234

Supraorbital nerve block, 38, 39–40, 41, 147

Supratrochlear nerve block, 38, 40, 41, 147

Surgical techniques, basic, 21–27
- blunt dissection, 26–27
- hemorrhage management, 23–25
- incisions, 21–23
- sharp dissection, 27
- undermining skin edges, 27

Suture line, redness and irritation of, 95–96

Sutures
- absorbable versus nonabsorbable, for primary wound closure, 93
- buried intradermal, 11–12, 139
- continuous, 9, 10, 15, 16
- vs. interrupted, for facial wounds, 148–149
- for facial wounds, 148–149, 158
- figure-of-eight, 12–13
- mattress, 10–11, 14–16, 93
- removal of, 3, 15–16, 95, 149
- in children, 3
- from facial lacerations, 149
- in primary wound closure, 95
- for scalp lacerations, 156
- simple, 93
- size of, in primary wound closure, 93

Suturing, 1–20
- alternatives to, 16–19
- of blood vessels, 24–26
- contraindications to, 86–87
- of extensor tendon injuries, 308
- of eyebrow lacerations, 154–155
- of eyelid lacerations, 153, 154
- of facial lacerations, 147–149
- of fingertip wounds, 285
- instruments for, 5–7
- of intraoral lacerations, 151–152
- of lip lacerations, 150, 151–152
- of nail bed tissue, 290
- needles for, 1–2, 6
- holder for, 5, 6
- needlestick injury prevention during, 47
- of nerve injuries, 314, 315–317
- for primary wound closure, 93–95
- effect on scarring, 139
- suture materials for, 3–4
- techniques of, 5–15
- suture placement, 7–13
- suture removal, 3, 15–16, 95, 149

Swelling
- compartment syndrome-related, 334
- excessive, as contraindication to primary wound closure, 87
- hand infection-related, 149
- infection-related, 89

Tamponade, cardiac, 53

Tangential excision, of burns, 199, 200–201, 325–326

Tar, adherence to burn wounds, 197, 321

Tearduct injury, 154

Tendon injuries
- crush injuries, 330
- of the hand, 307–312
- examination of, 270
- extensor tendon injuries, 308–312
- flexor tendon injuries, 307–308
- mallet finger, 310–312
Tendon injuries (cont.)
traumatic amputation-related, 303
Tendons, with overlying wounds, 88
Tenosynovitis
flexor, 344
acute suppurative, 347, 350–353
rheumatoid arthritis-associated, 353
stenosing. See Trigger finger
Tensor fascia lata flaps, 169–170
Tetanus, risk factors for, 58, 59
Tetanus immunization, 59
Thenar eminence, 257
use as flap, 287–289
Thenar flaps, for fingertip injuries, 287–289
Thenar muscles, fasciotomy of, 335
Thermal injury, 192
Thigh, as skin graft donor site, 100
Thoracostomy, needle, 54–56
Thumb. See also Interphalangeal joints (IP) splinting of, 278, 279
Thumb spica splint, 278–279
Tibia and fibula, fractures of, 205–219
case example of, 205–206
closed fractures, 206
comminuted, 207
compartment syndrome associated with, 207–211
distant flap coverage for, 218
free flap coverage for, 218
local muscle flap coverage for, 212–218
open (compound) fractures, 206, 210, 211–218
Tinel’s sign, 361
Tingling, in the hand
carpal tunnel syndrome-related, 361
compartment syndrome-related, 334
Tobacco use. See also Smoking
Tongue
as airway obstruction cause, 50
in Pierre Robin syndrome, 243
free flap reconstruction of, 133–134
lacerations of, 152
Tooth alignment, in facial fracture patients, 252
Topical agents
for burns, 198
local anesthetic, 29–30
Tourniquets (cont.)
pain associated with use of, 317
in suppurative flexor tenosynovitis drainage, 351
in tangential excision of burns, 327
in trigger finger release, 358
TRAM (transverse rectus abdominis muscle) flap, 246–248
Transferrin, serum levels of
as nutritional status indicator, 74, 176
in pressure sore patients, 167
Transverse rectus abdominis muscle (TRAM) flap, 246–248
Trauma patients
evaluation of, 49–56
ABCs of, 49–53
case study of, 54
needle thoracostomy in, 54–56
neurologic examination in, 53–54
Trigeminal nerve branches, anatomy of, 38, 39, 40, 41
Trigger finger, 355–360
Triple antibiotic ointment, 82
Trochanter, pressure sores of, 163, 169–170
Tuft fractures, 294–295
Tying off, of blood vessels, 24–25
Ulcers
decubitus, 161
of the leg, 177–180
Ulnar artery
injury to, 318–319
ulnar nerve injury associated with, 260
location of, 264, 265
Ulnar artery pulse, 264
Ulnar gutter splint, 279–280
Ulnar nerve
function testing of, 263, 270
injuries to, 308
sensory distribution of, 259, 260
Ulnar nerve block, 37
Unconscious patients, hand injury evaluation in, 271–273
Undermining, of skin edges, 27
Valium. See Diazepam
Varicose veins, 178
Vascular examination, of injured hand, 269–270
Vascular injuries, hand, 317–319
crush injury-related, 331
Vasoconstriction
epinephrine-related, 31, 32, 151, 152, 153
nicotine-related, 175
Vegetables, as protein source, 75
Venous insufficiency
capillary refill in, 265–266
as leg ulcer cause, 177, 178, 179, 180
Vermilion border, in lip lacerations, 149, 150, 151
Vesicles, herpetic infection-associated, 350
Vibrio infections, 187, 343
Visiting surgeon programs, 241–242
Vitamin A, 76–77
Vitamin A supplementation, for wound healing, 176, 177
Vitamin C, 77
Vitamin C supplementation
for pressure sore prevention, 164
for wound healing, 176
Vitamin E, 77
Vitamin E supplementation, for wound healing, 176, 177
V-Y advancement flaps, 114, 118–119, 170–171
Water, sterile, as wound cleanser, 81
Watson knife. See Knife, skin-graft (Humby)
Wound care, 79–84
dressing techniques for, 82–84
inadequate, as chronic wound cause, 173
supplies for, 80–82
Wound closure
guidelines for, 88–89
primary, 91–96
aftercare in, 95
anesthetization for, 92
contraindications to, 91
delayed, 96
of facial wounds, 145
scarring associated with, 139
of skin lesion biopsy sites, 228, 229–230, 232
suturing procedure in, 93–95
“reconstructive ladder” of, 64–65, 85
secondary, 85–89
contraindications to, 88
indications for, 86–87
scarring associated with, 139
of skin lesion biopsy sites, 228–229, 230, 232
skin edge undermining in, 27, 115–116
of traumatic amputations, 304
Wound healing
impairment of
malnutrition-related, 58, 73
medical illness-related, 58
